# Compostable Carry Bags

Eco-friendly compostable carry bags made from corn starch (Poly-Lactic Acid). Does not contain any harmful plastic ingredients such as Polypropylene, LDPE/HDPE etc. ... Poly-Lactic Acid (PLA) is derived from Sugarcane starch or corn starch, which makes these bags 100% natural.

Starch based Corn bags is a revolutionary material capable of breaking down in cleaner ways, without compromising quality and safety. It also contributes towards reducing green-house effect and acid precipitation.

## 100% Compostable Bags

- An alternative environment friendly product it is biodegradable, compostable and sustainable
- Disposal of bags is more cost effective as it disintegrates over shorter period of time
- Bags will Compostable within 180 days in ideal conditions (presence of microorganism, moisture and UV Light)
- New range of starch based biopolymers
- Made from organic raw material
- No compromise to quality and safety.

These bags find application in almost everywhere in one form or another such as in canteens, hotels, home or allied places. The bags are used to pack bread, poultry, sandwiches, vegetables and milk products.

The attributes of our products are as follows:-Expandable-Capacious-Recyclable-Oxo Biodegradable.

# Biodegradable Plates, Cups, Mugs and Cutleries

World of eco –friendly biodegradable plates, cups, mugs and cutleries, Biodegrades naturally in 180 days.

Can be used in micro oven as well as refrigeration as all these can with stand temperature range of -20-to 120 degrees.  
Oil and water resistant and leak proof.
